DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species groups:

Group I:

- Species I-A: The rotary indexer is a cam-driven mechanical indexer (e.g., see claim 4).
- Species I-B: The rotary indexer is a servo driven dial table (e.g., see claim 5).

Group II

- Species II-A: A shot pin helps to guide the object carrier (e.g., see claim 11).
- Species II-B: A V-block mechanism helps to guide the object carrier (e.g., see claim 12).

Group III

- Species III-A: Magnetically coupling a motor onto the spindle (e.g., see claim 19).
- Species III-B: Pushing the spindle with a friction coupling (e.g., see claim 20).

Group IV

- Species IV-A: Two of the three alternate perpendicular axes are vertical (e.g., see claim 25).
- Species IV-B: Two of the three alternate perpendicular axes are horizontal (e.g., see claim 26).

2. The species are independent or distinct because claims to the different species of each group recite mutually exclusive characteristics. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits from each of the four species groups (i.e., Group I, II, III, and IV) to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 27, and 36 appear to be generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a

claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

3. A telephone call was not made to applicant in this particular case because this species restriction is considered complex (i.e., the restriction requires more than one election), see MPEP 812.01.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
